SUMMARY

Final-year Computer Engineering student passionate about AI/ML and Web Development. Experienced in Python, OpenCV, and full-stack web projects. Hands-on experience implementing ML models such as Linear Regression, K-Means Clustering, Decision Trees, KNN Classification.

EDUCATION

B.E. in Computer Engineering – Khwopa Engineering College, Purbanchal University, Expected 2025

COURSES

Currently taking: AI with Python: Machine Learning, Deep Learning & Generative AI (LLMs) Training at Broadway Infosys

TECHNICAL & MACHINE LEARNING SKILLS

- **Programming:** Python, C, C++, JavaScript, HTML, CSS
 - **ML Libraries:** NumPy, Pandas, Matplotlib, Seaborn, PyTorch, TensorFlow, scikit-learn
 - **Other Tools:** OpenCV, React (basic), Node.js (basic), MySQL, Git
 - **ML Models:** Linear Regression, K-Means Clustering, KNN Classification, Decision Trees, Random forest
-

PROJECTS

Facial Recognition Attendance System

- Built attendance system using Python & OpenCV
- Automated image capture, recognition, and logging
- Real-time facial detection using ML

eCommerce Website (Mobile Shop)

- Full-stack project using HTML, CSS, JS, PHP, MySQL
 - Implemented admin panel, product listings, cart, checkout
 - Responsive UI for desktop and mobile
-

ADDITIONAL INFORMATION

- Actively learning AI, ML, and Web Development through online courses
- Strong problem-solving and analytical skills
- Enthusiastic about applying AI/ML to real-world projects
